

# Medication Take-Away

## Your medication:

Please note that your biologic medication will need a prior authorization (PA) through your insurance. This process may take 30 business days to complete. Depending on availability, our office may provide samples for the initial 15 days of the waiting period. In instances where the PA takes longer than expected, we may be able to provide additional samples. Due to a limited supply, our office cannot guarantee the availability of samples.

Please contact your insurance company to identify an in-network specialty pharmacy. You may check with your specialty pharmacy weekly to find out the status of your medication. Once your PA has been approved, you will need to contact your specialty pharmacy to schedule the delivery of your medication.

Your specialty pharmacy may contact you for delivery as well. Please be prepared to answer calls from unfamiliar phone numbers.

**If insurance denied your medication, please contact the medication company directly using the number on the next sheet of paper.**

**If it has been longer than 4 weeks, and you have still been unable to get your medication, please contact our in-office Prior Authorization Specialists at 208-542-9080, opt. 5, and leave a detailed voicemail.**

**Our provider's medical staff are unable to help with prior authorizations.**

## Medication Companies

☐ **Abbvie: (800) 222-6885**

Rinvoq (upadacitinib) tablet, Humira (Adalimumab) injection, Skyrizi (Risankizumab) injection
